PROJECTS

Weather App

Designer, Developer

📅 2021 - current

- Built a weather web app which allows the user to input location to find the current weather.
- Used JavaScript to fetch data from OpenWeatherMap API and extracts needed data from JSON format and is displayed.
- Working on to add the forecast for the next 5 days of that location.

To-do List App

Developer

📅 2021

- Made a simple to-do list web app using JavaScript.
- App allows the user to add the task that needs to be completed. which can be modified later.

CAREER OBJECTIVE

Front-End Developer with a enthusiasm to collaborate with senior developers to learn and develop digital products and solutions. Enjoy working closely with team members to ensure workloads are effectively redirected to bottlenecks and personally picking up the slack when necessary. With a passion for both personal growth and for software development, self-taught with 600+ hour coding camp to learn new languages while sharpening existing skills. I aspire toward a career that will allow me to channel my creativity through crafting amazing websites and engaging user experience.
